

HOW IT WORKS

We set it up, and **solve it.**

Your goal becomes a map. Each step points to what it depends on. No loops, no orphans — every move earns its place. The orange move is where you start. The gold moves are the ones that decide everything.

GOAL: LAUNCH YOUR OFFER · DEPENDENCY-ORDERED · 9 MOVES, 5 TIERS

Genesis — the one move with nothing in its way. Start here.

Key — the moves that decide whether everything after them survives.

Outcome — done.

HOW WE PRICE

The price follows *the work*.

Every project is priced from what it actually requires. We size the work first — the number is derived from it, never guessed.

ROLE	THE WORK	PER LOG / HOUR
Apprentice	Supervised execution <i>Building standing, learning the system</i>	\$39
Wrangler	Execution — defined work, done <i>The floor of real delivery</i>	\$65
Architect	Design & structure — how the work is shaped <i>The decomposition itself</i>	\$85
Operator	Judgment & ownership — the calls that carry consequence <i>The rarest work</i>	\$100

role-weighted LOGs ÷ 0.75 = project price

The ÷ 0.75 funds the 25% network reserve off the top — so every engagement is fully funded and the system sustains itself.

WHAT THE CLIENT SEES

One flat project price. The role math is how we arrive at an honest number — it stays our tool. You receive a single figure you can say yes to, with the full equation available if you want to see it. The price follows the work. Always.

WHAT WE'LL ASK YOU

Seven questions, and you get *a map*.

Tell us this much and we'll show you the fastest path to your goal — free, to start. No commitment. No pitch. Just the order of the work, in your hands.

1

What's the goal?

In your own words. What are you trying to make happen?

2

What does "done" look like?

How you'll know it worked. The finish line.

3

What's the timeframe?

When it needs to happen, or when you'd like it done.

4

What's already in motion?

What you've started, tried, or already completed.

5

Biggest obstacle?

The hard part, the unknown, the thing that keeps stalling it.

6

Who's involved?

Who does the work, who signs off, who has to say yes.

7

How do we reach you?

Name, where you're from, email address.

→

Then: your free partial map.

The real first steps and the moves that matter most. Yours to keep.

We have a conversation first. **No number exists until we understand the work.**

From that conversation you get a free partial map of your project — the first moves and the order they go in. If it's a fit, we run it together. If it's not, you still have the map.
