

We work with small business owners who are *swamped*.

THE SITUATION

Too much going on. Not sure what to do first. Losing time on the wrong things. The work exists — **the order doesn't.**

WHAT WE DO

We map the fastest path to your goal and run it with you. That means breaking the work into the exact steps, in the right order, with what can run at the same time identified. **You stop managing the chaos and start receiving the result.**

HOW IT WORKS

A conversation first. We understand the real shape of what you are trying to do — the goal, what done looks like, what's already in motion. From that we build a free partial map of your project: the real first moves and the order they go in. **Yours to keep, whether or not we work together.**

HOW WE PRICE

The price comes from the work — never from a number we pulled from the air. We size the engagement first, show the equation, and name one flat number. **You see the math before you sign anything.**

Hours of work × value of that work ÷ 0.75 = project price
