

PREPARED FOR

[Client name], following our discovery conversation
and the partial map of [their goal].

We mapped the path. Here's how we *run it*.

This proposal sets out what we will deliver, how we will deliver it, and
exactly what it costs — derived from the work, not guessed.

YOUR GOAL, AS WE UNDERSTAND IT

[Restate the goal in plain words — what they are trying to achieve and what "done" means. One or two sentences that prove you listened.]

ENGAGEMENT TYPE

[Project / Retainer]

ESTIMATED TIMELINE

[X weeks / one cycle]

INVESTMENT

\$[X,XXX]

WHAT WE WILL DELIVER

The work, scoped completely.

We take this off your plate end to end — the full decomposition, the sequenced plan, and execution by our team. You are updated, not involved in the coordination. You receive the result.

DELIVERABLES

- 01 [Deliverable one — a binary, done-or-not outcome]

[What it includes / what verifies it complete]
- 02 [Deliverable two]

[What it includes / what verifies it complete]
- 03 [Deliverable three]

[What it includes / what verifies it complete]
- 04 [Add or remove rows as needed]

[Pull directly from the decomposition]

WHAT STAYS WITH YOU

HUMAN CHECKPOINTS — DECISIONS THAT REMAIN YOURS

[Name the legal, financial, or final-approval decisions that stay with the client. This is honest and it builds trust. e.g. "Final approval on all public-facing copy before publish. Any legal filings or financial commitments remain with you."]

HOW WE WORK

01 Map Full decomposition — every step, in proven order, with what runs in parallel.	02 Execute Our team runs the work. You are updated, not managing the coordination.	03 Verify Each deliverable is confirmed done — binary, no ambiguity.	04 Settle Settled on verified completion. The number you agreed to, nothing more.
---	---	---	--

INVESTMENT

The price follows the work.

We sized this engagement against its actual scope — not a guess. One number, everything included. The equation is available if you want to see it.

[Project name]

\$[X,XXX]

FLAT FEE

Flat project price. Covers the full decomposition and execution of the scope on page 2. Derived from [X] LOGs × [rate] ÷ 0.75.

FUNDING

Confirms the start

Work begins once the engagement is funded. [Deposit / full / milestone — your terms]

TIMELINE

[X weeks]

From the critical path of the decomposition. Extensions apply only if client deliverables are late.

SETTLEMENT

On verified completion

Settled when each deliverable is confirmed done. No ambiguity about what triggers payment.

If this reflects what you want, we confirm and begin. **If anything needs adjusting, we revise the scope and the number follows it.** The scope is the anchor — the price is its output.
