

BIXXVILLE · LAND OF GEB, LLC

Real skills, for real kids.

Three programs for St. Croix families — built for the kid falling behind, the kid stuck in a system that isn't challenging them, and the young adult who wants to earn from a real skill. Every class is tailored to the person in front of us. Sliding scale available for families who need it.

THE OFFER

Math Tutoring	\$50 / hour	3 weeks · 2x/week · Zoom · weekly recap sheet. Ongoing. <i>Sliding scale to \$35/hr for families who need it.</i>
Claude Code Class	\$175 / month	4 weeks · 1-on-1 · leave with a website you built yourself. <i>Sliding scale available — just ask.</i>
Sales Crash Course	\$200 / week	1 week · scripts, product-market fit, product-channel fit, ideal buyer. <i>Leave with a website, your first sale plan, and the scripts to make it happen.</i>

You already know something's off.

Every parent I talk to says a version of the same thing: my kid is smart, but something's not landing. The report card doesn't tell you what to do about it. The teacher can only say so much. And after storms closed schools for months, and a pandemic emptied classrooms, a lot of kids are quietly a year or two behind — not because they're not capable, but because nobody rebuilt the base with them.

IF YOU'RE A PARENT SAYING...

"He's smart, but he shuts down the second he sees math."

That's not a math problem — it's a sequencing problem. He was moved forward before the base was built. We rebuild the base. He stops shutting down.

IF YOU'RE A PARENT SAYING...

"She's bored. School isn't giving her anything to push against."

Gifted kids aren't served by more of the same. They need harder problems, real tools, and a real challenge — not busywork. We give her that.

IF YOU'RE THE STUDENT SAYING...

"I want to make real money. I don't want a five-year plan."

Then you don't need a lecture — you need a working website, a real product, and the scripts to sell it. That's what the Claude Code and Sales classes exist to hand you.

PROGRAM 01 · MATH TUTORING

Confidence you *can measure.*

By the end of three weeks, your child should be able to look at a new problem — one we didn't teach them — and know how to start. Not just get the right answer. Actually understand why it works.

WHAT YOUR CHILD LEAVES WITH

- ✓ **A rebuilt base**
The foundations they were quietly missing. Fractions, decimals, ratios, the language of algebra — whatever the diagnostic shows is broken.
- ✓ **A working method**
The four-step decomposition (equation → history → story → aim). Applied to any problem, in any class.
- ✓ **Three cheat sheets**
One after every week. The concept, the method, one worked example. Something they can keep on the desk.
- ✓ **A real assessment**
Not a grade. A specific picture of where they are, what's next, and whether it's worth continuing.

FORMAT

Zoom, 1-on-1
BIXXVILLE · LAND OF GEB · MATH TUTORING

LENGTH

3 wks · 2x/wk

INVESTMENT

\$50 / hour

We trust the math.

PROGRAMS 02 & 03 · SKILLS THAT EARN

Leave with something you can sell.

For the young adult who wants a real skill, not a five-year plan. Two intensives. Both hand you something on the last day that you can use to make money the next.

PROGRAM 02

Claude Code Class

\$175 / month

4 weeks · 1-on-1 · sliding scale available

WHAT YOU LEAVE WITH

- ✓ **A live website**

Real, on the internet, built by you — not a template you filled in.
- ✓ **A working understanding of AI**

What it can do, what it can't, and how to actually use it — without the hype.
- ✓ **A build habit**

You leave able to make the next site on your own. The AI is your tool, not your crutch.

PROGRAM 03

Sales Crash Course

\$200 / week

1 week · flat rate · high school seniors welcome

WHAT YOU LEAVE WITH

- ✓ **A live website**

The storefront your product actually sells from — built during the week.
- ✓ **Your sales scripts**

The exact words for the first conversation, the follow-up, and the close.
- ✓ **Product-market fit guide**

How to know if what you're selling actually wants to exist. The test, not the guess.
- ✓ **Product-channel fit guide**

Where your ideal buyer already spends time — and how to reach them there first.

THE INVESTMENT

The price follows the work.

One number per program, everything included. No pressure calls. No hidden add-ons. And if a family genuinely can't reach the number, we work it out — because no child should stop learning over a bill.

PROGRAM	STANDARD	SLIDING SCALE
Math Tutoring	\$50 / hour	Down to \$35 / hour
Qualifying families — no forms, just ask.		
Claude Code Class	\$175 / month	Reduced rate available
For families who need it — we'll work it out.		
Sales Crash Course	\$200 / week	Flat rate
Same price for everyone. You leave with a website, scripts, and a plan.		

HOW THE SLIDING SCALE WORKS

No paperwork. No income verification. You reach out, we talk, we land on a number that works. Priority for St. Croix families and long-term commitments.

Tutoring & Skills Program

01 — WHAT THIS IS

We decompose math the same way we decompose work.

Every class is built around one child, not a curriculum on a shelf. We take the same system Land of Geb uses to break down a job into scoped, sequenced pieces, and we run it on math, coding, and sales — so kids build real understanding, not memorized steps.

STRENGTHEN & STRETCH

Math Tutoring

Zoom · 3 weeks · 2x/week + a weekly cheat sheet to lock it in.

Every problem breaks into 4 parts: the equation, the history, the story (the word problem), and the aim.

Built for gifted & talented kids too — a harder problem, not a slower one.

Goal: real understanding + real-world application.

BUILD REAL SITES

Coding with Claude Code

1-on-1, 1 hour sessions, 4 weeks, 2x/week.

Kids learn to build actual websites using Claude Code — real projects, not worksheets or slides.

By the end, they've shipped something they can show off.

Goal: build something real, understand how it works.

1-WEEK CRASH COURSE

Shopify & Sales Crash Course

A 1-week intensive on building and selling a digital product on Shopify.

It's the exact same process behind this program — decompose the offer, build it, put it in front of people.

Goal: launch a real storefront, sell a real product.

Every plan above is a starting point, not the finished class — once you're in, we build the actual sessions around what your child specifically needs.

02 — WHO THIS IS FOR

Let's build the right class for your child.

STUDENT

CHILD'S NAME	GRADE / AGE	PREFERRED DAYS & TIMES
PARENT / GUARDIAN NAME	EMAIL	PHONE

WHICH PROGRAM?

☐ Math Tutoring — 3 wks, 2x/week ☐ Coding with Claude Code — 4 wks, 2x/week ☐ Shopify & Sales — 1 wk crash

TELL US ABOUT YOUR CHILD

The more specific you are here, the more the class is actually built for your kid.

NOTES FROM TEACHER(S) — REPORT CARD COMMENTS, IEP NOTES, ANYTHING FLAGGED

WHAT HAVE YOU NOTICED AS THE PARENT? WHERE DOES IT FEEL LIKE A STRUGGLE?

GIFTED, TALENTED, OR JUST NEEDS MORE OF A CHALLENGE? TELL US WHAT THEY NEED MORE OF.

BEFORE WE START

☐ My child is able to sit and stay engaged at a computer for the full Zoom session.

☐ I understand enrollment locks in the full program (math: 3 weeks · coding: 4 weeks · Shopify: 1 week) once it starts.

FOLLOW THE NETWORK
